Nomadism

Wifi

Wifi campus

You can use the UGA wifi **wifi campus** for you, but it is also possibile to open account for visitors following this procedure with your login Agalan, that is described there.

Connexion through **wifi campus** is not secure! Do not browse and post sensible information (bank account, etc)

Eduroam

Eduroam comes from an international cooperation of univ/library to provide internet access through your institution credential. Before going abroad, it may be really usefull to set up your computer to work with Eduroam. The procedure to use eduroam with your université account is describe here.

VPN

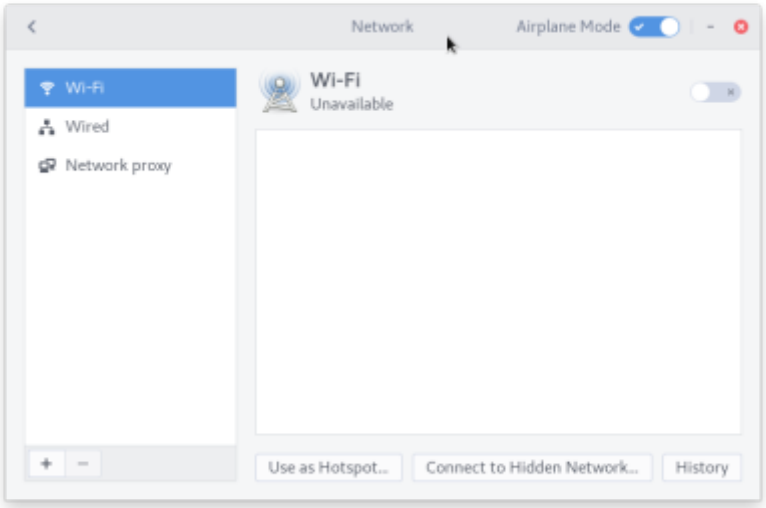

The university provides a VPN access through CiscoVPN.

It has build in application for android or other spyphone;

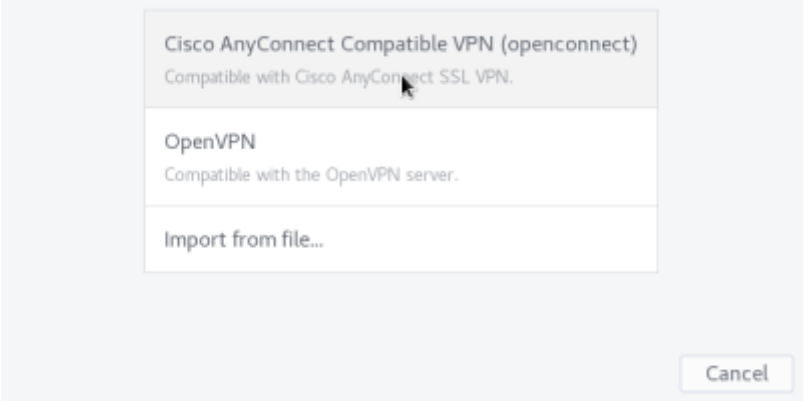

Under a Debian-base computer, you can install and configure it via NetworkManager and OpenConnect:

```
sudo apt install networkmanager-openconnect
```

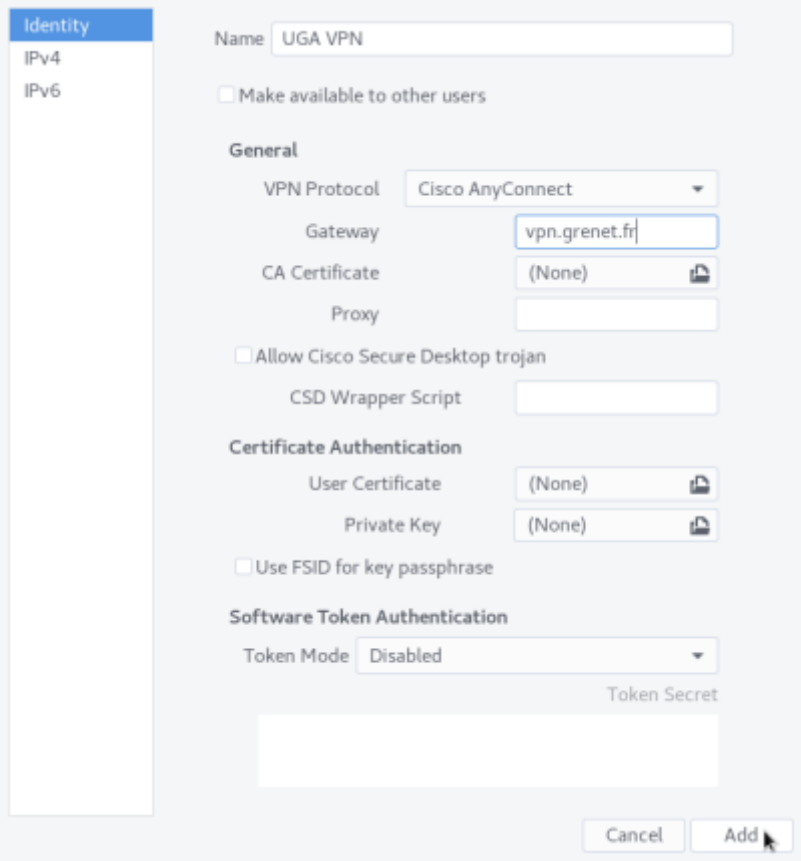

Then, open NetworkManager and go to `Network Settings`

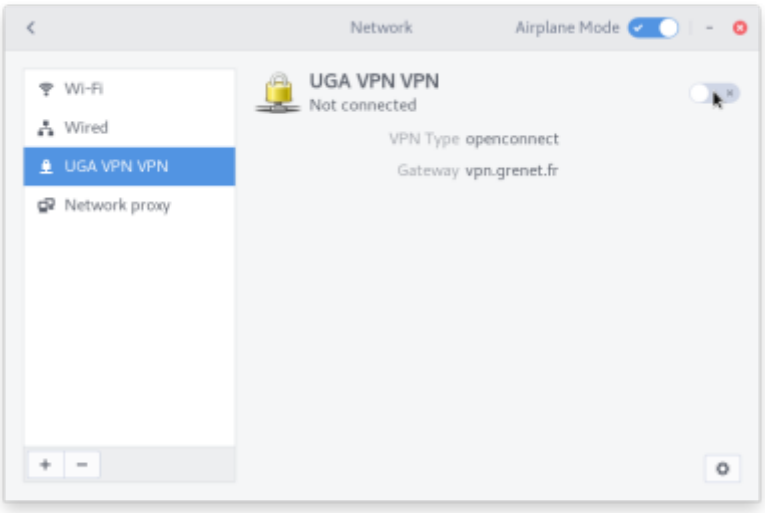

Click on the + icon at the bottom left and select `CiscoAnyConnect Compatible VPN`

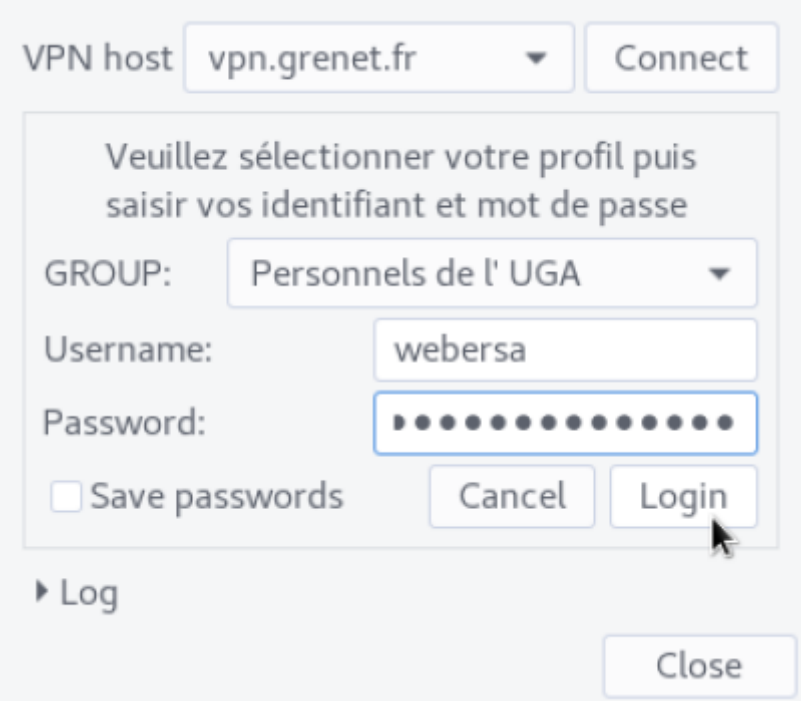

Fill in the name you want and the gateway with `vpn.grenet.fr` and click Add

Here it is, now connect to the VPN by toggle the button :

And in the popup, select `Personnels de l'UGA` and your Agalan credential, then `Login`

Tindin ! Now all your internet connexion is seen as comming from the university.
